IN YOUR EAR

By Susan Anderson, General Manager

On August 7, 1945, the United States used atomic weapons for the first time against the people of Nagasaki and Hiroshima. Some argue that the dropping of the bomb ended an era, or was instrumental in ending World War II by forcing the final surrender of the Japanese government. Of course, there are many who differ with this view, arguing strongly that the bomb represented a useless and destructive strategy, overkill in a situation in which surrender was inevitable.

Strategic contentions aside, the bombing of those Japanese islands forty years ago has cast a shadow over the world, caused the deep agonizing suffering of the people of Hiroshima, and Nagasaki even to this day, and left us a world more threatened, more perilous than before.

At KPFK we plan to commemorate the 40th Anniversary of the bombing of Hiroshima-Nagasaki beginning Monday August 5th at 8 p.m. with a live broadcast from the Mark Taper Forum that will include dramatic readings and musical performance for the sake of peace. We will continue our commemoration all week with programming exploring the atomic age each weekday at 3 p.m.

Another program highlight—Sunday August 11th marks another anniversary. It has been 20 years since the riots broke out in Watts. We will spend several hours both going back to those days of violence and protest in 1965 and updating the situation today.

Take a look through your Folio. KPFK has many specials and surprises planned for this month. Let your non-subscribing friends know about us. We need you all now, more than ever.
